International Active Members — 68-69
F1 Members — 73-80
The ABBA Board of Directors consists of forty-four elected directors and past presidents. Forty of these directors are elected from eleven areas in the United States and four are elected from the ABBA international membership. The ABBA Board of Directors elects the officers as well as six members to the executive committee. The ABBA President appoints seven committee chairmen and multiple committee members to develop and implement programs for the association.
Welcome Brahman Enthusiasts!

This Resource Book and Directory are designed to help you locate members of the American Brahman Breeders Association and our F1 Program members; to learn more about the fabulous American Brahman; and to familiarize you with the many programs available to you as a valued member of the Association. Please keep it as a “handy” reference guide. This guide is also available on the ABBA Website at www.brahman.org. As ABBA begins its 94th year, our cattle and our Association are continuing to take our place in the production of “red meat” in the United States and around the globe.

The role of the ABBA, in a nutshell, is to record the ancestry of our cattle and to promote their use. The American Brahman’s contributions to the U.S. and world beef cattle industry begin with their unexcelled environmental adaptability and crossbreeding abilities. The practical, adaptable, long lived, trouble free American Brahman and their crossbreds contribute mightily to the commercial cattle industry around the globe. ABBA member/breeders have kept pace with the demands of the beef industry and have made great strides “meating” the needs of the industry. Feeding trials and carcass work of the past sixteen years has allowed the Brahman breed to focus on and vastly improve carcass quality in the areas of muscling, intramuscular fat, and tenderness. We have proved to the industry that Brahman and Brahman cross cattle can make valuable contributions.

Should our dedicated staff, officers, or directors be of any help to you, please only ask. Call or email, or come by your office in Houston, Texas at any time.

Most Sincerely,
J. D. Sartwelle, Jr.
President

American Breeders Registry Association

The American Breeders Registry Association (ABRA) processes all applications for registration, transfers, performance and accounting for ABBA.

ABBA & ABRA is here to serve you.
Change is the precedent to advancement.

The best way to be progressive, is to move forward with the changing times. It is time for the American Brahman Breeders Association (ABBA) members to take another step toward being progressive cattlemen.

For the Brahman breed, progression means changes to the DNA rules implemented by the ABBA. DNA-testing is not new to the breed. In fact, the association already undergoes a variety of DNA-testing to verify donor cows used in embryo transfer (ET) and sires collected for artificial insemination (AI). The increased use of such reproductive technologies among beef cattle breeders has made DNA-testing increasingly crucial for the advancement of the industry. If other breed associations are aggressively keeping up with the evolving technologies, why shouldn’t the ABBA.

As progressive Brahman producers, we want to breed animals so only those with the best genetic characteristics will be passed on to the next generation. To do this, we pour our time and money into controlling the breeding process by specifically selecting our breeding stock in hopes of producing a complementary mixture of the best traits from both parents. Whether we are selecting straws of semen or picking the cover bulls from a lot, when a calf hits the ground it can be hard to verify with certainty its parents. Accidents are inevitable, whether it be the neighbor’s bulls getting in with your cows, wrong semen straws being pulled during AI, or data being entered incorrectly. This is where a DNA test is convenient. DNA-testing has many purposes, but its primary use is parent verification for an animal. As part of the new DNA Requirements the ABBA is requiring that all embryo transfer calves, animals entering ABBA Open shows and those participating in the ABBA Approved Sales & Research Programs all be parent verified after January 1, 2017. Prior to these animals being parent verified, the individual calf’s sire and dam must be on file and then the calf must match, which confirms the Brahman calf’s parents. The new requirements are to insure that pedigrees are correct, award winning animals and their parents are properly recognized as well as to assure buyers that they are getting exactly what they are paying for in a sale. The new rules for DNA-testing will ensure the integrity of Brahman breeders and hold them accountable for reporting accurate information when registering animals.

The implementation of the new DNA rules will occur over time. This way not every Brahman breeder will be affected immediately.

In the near future breeders will have the option of requesting the completed forms from the ABBA Office as well as the ability to download them on an as needed basis from the ABBA website.

As an added advantage on top of parent verification, the comprehensive genetic information offered solely through DNA-testing provides solutions to cattle producers to predict the specific breeding value of their animals. The concise process turns a hair sample or a few drops of blood into a management tool that helps producers make decisions to maximize production and, ultimately, profitability.

Cattle producers seek a high number of production traits, which turn out to be genetically controlled by an immense number of genes. If the parents of a calf are correctly linked, producers can make more accurate culling and breeding decisions. In turn, genetically marking younger animals has the potential to decrease the generation interval. This will result in increasing the value of the Brahman breed more rapidly. DNA-testing technology is not replacing EPDs, rather providing genomically enhanced EPDs that more accurately describe an animal’s traits by combining the pedigree, DNA markers and the phenotypic data.

The ABBA Board of Directors is trying to make the process as simple as possible for its members by partnering with both Zoetis & Geneseek to perform the DNA tests.
The following DNA rule changes were effective Jan. 1, 2017:

For ABBA members who pasture breed cows using single sires, DNA-testing will not be required for registering calves unless animals are shown in ABBA approved open shows, sold in ABBA sponsored sales, or used in ABBA research programs.

Only animals born after January 1, 2017 are required to be parent verified prior to being shown in an ABBA open show.

ET calves must be DNA Parent Verified prior to registration. Sires and dams should be fingerprinted and the calf must be DNA-tested soon after birth. Acting in a timely manner will ensure the DNA results will be back in time to prevent any delays in registration.

Cattle resulting from AI must be parent identified if animals are shown in ABBA approved open shows, sold in ABBA sponsored sales, or used in ABBA research programs. However, starting Jan. 1, 2019, registering AI calves will require DNA-testing and verification of the sire only.

For more information on the specific requirements of the DNA rule changes, how to DNA test your cattle and for frequently asked questions visit the American Brahman website at www.brahman.org or contact the ABBA Office at 713-349-0858.

The procedures to test cattle are simple.

1. The breeder needs to first test the sires & dams (if applicable).
2. The breeder contacts the ABBA Office with the registration number of the animal to be verified and requests the test kit & form. Breeders can also request a quantity of test kits and complete the form on the ABBA website, print it and mail to the approved lab.
3. The results will be returned to the ABBA Office from the approved lab.
4. The ABBA Office will list the results on the animal’s file and send the breeder a copy of the results and an invoice for payment ($25/sample).

Since the beginning of cattle production, ranchers have kept record of their animal’s performance.

Breeders have evolved from writing performance information on the back of paper feed sacks to entering this same information into modern computer technologies in the passenger seat of the pickup.

Brahman producers have increasing access to information about their individual animal’s breeding value, which presents the responsibility to use this knowledge to make sound breeding decisions to increase the value of the breed.

The ABBA has implemented several programs to help establish a breed inventory of performance data. The Brahman Herd Improvement Records (BHIR) is a herd record keeping system specifically designed to identify the genetically superior individual animals in a Brahman breeding herd. This nationwide database allows breeders to submit information on their breeding stock’s performance profile. The BHIR system serves as a valuable tool to progressive cattlemen for making management decisions, culling and selecting seedstock because it allows breeders to identify those animals that excel in traits resulting in economic importance. These traits include: reproductive efficiency, growth rate, mothering ability, longevity, conformation and disposition.

Chris Shivers, the executive vice president of ABBA, said the way the BHIR works is that Brahman breeders submit information at the time of registration. Information is recorded on the animal’s profile and submitted to the genetic evaluation which calculate EPDs. Then ABBA members gain access to the data to utilize in management decisions. For more information and the BHIR instruction manual is available at www.brahman.org.

Other programs, such as the ABBA Performance Tested Bull Development and Marketing Program and the ABBA National Carcass Evaluation Program, have been created in hopes of encouraging Brahman producers to gather knowledge on their herd’s genetics, but also to promote the breed’s value. Both programs provide cooperative activity among ABBA members to gather information on chosen individual’s genetic merit. By collecting this data breeders can make proactive decisions to improve their programs and the breed at a much quicker pace. In addition prospective buyers can buy these bulls with confidence knowing more about their potential as a sire.

The ABBA National Carcass Evaluation Program

The ABBA National Carcass Evaluation Program was developed to collect carcass data for promotion and merit evaluation, provide cooperative activity among ABBA members for gathering carcass information, reflect the industry’s desire to improve beef products and identify superior genetic strains within the Brahman breed. The program is sponsored by the association, which allows enhanced efforts in utilizing data to promote and improve the breed.

The success of the program is based on producers who are committed to bettering Brahman cattle. The program has proven the value of the Brahman breed, as well as helped improve Brahman cattle carcass traits. The steers in the program have been tested and proven to have similar cutability and quality grades of other well-established beef breeds.

At the conclusion of the program, feedback is provided to the participating producers on how their cattle performed in the feedyard and the type of carcasses produced. By assessing this information, producers can determine if they are on target or need to make adjustments to the genetics of their herd. Although profitability is not guaranteed by participating, the true value of the program stems from the knowledge gained on the genetic and carcass data to allow producers to make informed management decisions, which result in long-term profit maximization and breed improvement.

“There’s tremendous value in the carcass evaluation program because it gives you an outlet for steers or culled bulls,” said John Coleman Locke, who’s a long-standing participant in the ABBA.
The ABBA Performance Tested Bull Development and Marketing Program was first conducted in 2015. This fairly new program sponsored by the association was implemented to utilize performance data to promote and improve the breed.

“This program provides members opportunities to cooperatively feed and test bulls,” said Shivers, “and it allows breeders to market performance tested bulls to prospective buyers.”

It takes committed Brahman producers who are willing to participate in this type of program to increase the merit of the Brahman breed and establish its value among the beef industry. From 2015 to 2016, the program has seen an increase in participation from ABBA producers. The 2016 ABBA bull test featured 97 bulls from 37 breeders. The 40 bulls sold averaged $4,355 and were bought by progressive breeders in Arkansas, Florida, Louisiana, Mississippi, New Mexico and Texas.

“I think the ABBA bull test is a no brainer, whether you’re a small producer or a big producer,” said Locke who participated in the bull test program. “You get to comingle your bulls with other producers and see how they perform in relation to other peoples’ bulls.”

The data from the bulls is provided to the owners after the duration of the program. Not only does this allow producers to see where their breeding stock are at in terms of genetic potential and allows the performance data to be utilized in selecting and breeding for added value, but it proves the Brahman breed is valuable and competitive in the economically relevant traits.

To participate in this program, Brahman producers can nominate registered bulls born between January and April of the previous year. Bulls accepted into the program will be fed and housed at Texana Feeders in Floresville, Texas. After being backgrounded for 45 days, bulls will be weighed into the test, ultrasounded, scored on docility and a hair sample will be submitted to Zoetis for a DNA Panel and Parent Verification. The test period will occur throughout a 120-day period when the bulls will then be weighed off the test. To conclude the test, bulls will be weighted, measured for hip height, measured for scrotal circumference and given a disposition score. The top 40 high indexing bulls will be selected and prepared for a consignment sale.

“ABBA takes care of all the marketing so you don’t have to do anything extra,” Locke said. “you take your bulls there, you have them developed responsibly on a combination of a self feeder in a grass trap, and you have them marketed and put out there for everyone to see.”

There are producer fees that tie into the program costs, such as a nomination fee and feed costs, as well as criterias bulls must meet to be eligible for the sale.

“The best thing about it is the cost is either the same or sometimes less than what you could feed at home,” Locke said.

For more information on how to become involved, and the requirements of the ABBA National Carcass Evaluation Program, visit www.brahman.org.

Important Dates to Remember

January 3-7
Delivery of steers to ABBA Carcass Evaluation Program – Gonzales,TX

March 13-17
Deliver Bulls for ABBA Performance Tested Bull Program – Floresville,TX

October 24-26
ABBA Performance Tested Online Bull Sale

December 15
Carcass Evaluation Nominations Must be Received

carcass evaluation program. “If you just send calves to the sale barn you’re going to get less money for them and you’re going to get no data back. So it really helps give you a window into how well your genetics are doing and what kind of carcass qualities you have in your cow herd.”

To participate in the carcass evaluation program, producers can nominate registered steers born between January and April of the previous year. Steers accepted into the program must be weaned and have completed a health program outlined by the association 45-60 days prior to delivery. Steers will be fed at Graham Land and Cattle Company in Gonzales, Texas, in typical feedyard conditions. The feedyard manager will decide when to harvest the steers once the pen has reached the average weight and condition regarded as acceptable by the industry. There are program fees and costs for participation.

For more information on how to become involved, and the requirements of the ABBA National Carcass Evaluation Program, visit www.brahman.org.
The American Junior Brahman Association (AJBA) has the imperative responsibility for developing the future leaders of the Brahman breed and the beef industry. By providing youth opportunities for leadership development, friendly competition, friendships, and industry education, the AJBA is preparing the next generation for the tedious task of guiding the breed towards a progressive future.

Since 1980, the AJBA youth organization has grown its current membership to over 750 AJBA members from 17 states across the United States. Junior members range anywhere from birth to 21-years-old.

The program has proven to develop leaders based on the leadership roles held by current ABBA members. Currently, there are three members on the executive committee who were past AJBA members, as well as two committee chairmen and six people on the Board of Directors. In general, approximately 30 percent of active ABBA members are tied to the AJBA through their kids, grand kids or by being past members. The AJBA members of today are the ABBA leaders of tomorrow.

Every year, the ABBA holds the All American National Junior Show. Last year’s event had 250 members from nine states show more than 650 entries in West Monroe, Louisiana. The week-long event is the largest family occasion for the Brahman breed. Members between the ages of 8-18 compete in the cattle show, leadership events and other competitive events, such as public speaking, a herdsman quiz, photography contests and sales talk. Over $100,000 worth of prizes, premiums and scholarships are awarded to AJBA members. The amount of scholarships doubled from 2015-2016 to a record breaking $42,000 being presented to juniors who made outstanding contributions to the breed and industry.

This year’s All American is being held in Texarkana, Arkansas, July 3-8 at the Four State Fairgrounds.
The opportunities for the youth would not be possible without the assistance from the American Junior Brahman Association, their many sponsors and The Brahman Foundation (TBF). The Brahman Foundation is just over a year old and although not affiliated with the ABBA, they have a dynamic relationship and much of the 2016 association success was due to the assistance and support from the Brahman Foundation. The success of TBF is dependent on dedicated producers who are committed to the improvement of the Brahman breed and devoted to youth development. It thrives on member support to be able to continually give back to the breed and the future generations.

The ABBA and The Brahman Foundation partnered to provide an opportunity for juniors to learn about the industry and leadership development with others who share the same passion by organizing the first annual leadership camp in July 2016. Applicants were invited to the camp based on essay responses in the application. Camp participants learned about the history of the Brahman breed, evolving technologies in the beef industry, proper ways to handle meat, and how to be effective advocates for the beef industry. Stops included the Texas A&M meat science lab, Sexing Technologies, Kallion Farms and HEB where participants experienced hands-on demonstrations. Next year’s camp has big plans of utilizing the same techniques to give junior members a fun environment to learn, grow and network.

ABBA Offers Opportunities to Members
The American Brahman Breeders Association works for its members daily providing opportunities. The following are a few of the many programs that the ABBA offers to its members to promote, improve and make their operations more profitable.

Membership/Member Services
The ABBA is a membership organization that makes great efforts to provide its members with education, fellowship and service opportunities. In addition to the information provided on the association website, the association holds a yearly convention where members assemble to learn more about the breed, the industry, and programs but most importantly the opportunity for fellowship with fellow breeders. The association continues to pursue efforts to benefit the membership.

Shows & Exhibitions
Each year the association hosts twenty-nine open shows across the United States. These shows provide an opportunity for breeders to exhibit their cattle, compare genetics with other breeders, market their product as well as promote the breed to potential buyers and the general public.

Communications
The ABBA spends much of their effort on communicating with its membership as well as promoting the breed to the industry. One of the largest communications mechanisms is the association website that provides news, member & animal searches, association information and a calendar of upcoming events. The association also produces a bi-weekly e-blast for members and other interested parties which includes news of the association. The association realizes that it must provide a number of communication outlets to reach cattlemen and as a result utilizes print ads, press releases, social media and trade show displays promoting the breed.

Research & Breed Improvement
One of the most important components of the association is the continued improvement of the breed and a customized performance program to help breeders identify the production of their animals. Over the past ten years, the breed has vastly improved a number of traits and dispelled many perceived weaknesses. In this directory are several highlighted programs and important dates to help members participate in breed improvement programs. It is imperative that all breeders participate in these programs as together, great strides can be made in the improvement of the breed.
International Promotion
The American Brahman is a global breed and has exported more cattle around the world than any other breed. The association continues to develop new markets as well as support those already developed. Each year, the association takes a number of trips to provide members the opportunity to interact with breeders from around the world, develop relationships and market their genetics. We would encourage you to travel with Brahman and see the world.

Marketing
The ABBA provides opportunities for its members to market their cattle. Each year, the association hosts the International Brahman Sale, Spring Select Sale, Fall Select Sale, National F-1 Sale as well as facilitates our affiliates with their marketing opportunities. In addition to these events, the ABBA offers a Cattle for Sale listing on its website that is a free listing for all members.

F-1 & F-1 Plus Certification Programs
One of the flagship programs of the association is its tie to the commercial industry through its ABBA F-1 Certification & F-1 Plus Certification Programs. These programs have proven to add premiums of over $200 per head to females enrolled in this program over all other breeds and breed crosses.

American Junior Brahman Association
The American Junior Brahman Association is one of the bright spots of the association as it develops the future leaders of the organization. This program has proven to be beneficial for the future of the breed while also providing an opportunity for young people between the ages of 8-21 years to become breeders, exhibit cattle, participate in leadership contests and earn over $40,000 in scholarships.

The association and its leadership continue to look for additional ways to assist its members. It is important that you as members take advantage of these programs to benefit yourself, your program and ultimately the breed. If you ever have any questions about the many programs of the association, feel free to contact the association for more information or assistance in participating.

Helpful Hints for Submitting ABBA Performance Data

**BHIF Data Submission**

**Birth Weights**
Birthweights on calves should be taken within 24 hours of their birth. (BW tapes can be requested from ABBA)

**Weaning Weights**
Weaning Weights are to be taken between 120-300 days of age. Forming Contemporary Groups:
At least two calves of the same sex and same management are required to form a contemporary group.
Animals with similar management (birth-weaning) should be grouped together.
Animals from the same location should be grouped together.
Calves born in the same season should be grouped together.

**Yearling Weights**
Yearling Weights should be taken during the following date ranges:
- 320-410 days adjusted to 365 days
- 411-501 days adjusted to 452 days
- 502-600 days adjusted to 550 days

**Disposition Scores**
The ABBA is committed to improving the Brahman breed and eliminating any negative perceptions of the breed. The ABBA calculates a Docility EPD based on information submitted by breeders at weaning time. The Disposition/Temperment Score is based on the designation of a 1 (Docile) -5 (Excitable) pen scoring system. This numeric score is submitted on the Application for Registration at weaning.

**AI & ET Transfer Dates**
Beginning in January 1, 2016 the AI date & date embryos are transferred s required on the Application of Registration. When you AI or transfer embryos be sure to record this date so it can be easily submitted at the time of registration. This information will ultimately be used to calculate a Gestation Length EPD.

**Recipient Dam Information Dam Information for ET Calves**
When registering and submitting performance on embryo transfer calves it is mandatory to submit the identification of the recipient, her age as well as her breed make up. The ABBA has 5 recipient breed codes to choose from. It is of the most benefit to submit as many calves from the same breed type of recipient.

**Birthweights are REQUIRED for Show Cattle**
All Show Cattle exhibited in ABBA Approved Shows MUST have an Actual BW on the registration certificate in order to be eligible to be shown.

---

**ABBA Ultrasound Evaluation Guidelines**

The American Brahman Breeders Association is currently gathering ultrasound carcass information for the generation of EPDs for carcass traits from ultrasound data. For your ultrasound data to be included in the ABBA ultrasound evaluation, the following guidelines must be met:

1. Ultrasound images must be collected (scanned) by an Ultrasound Guidelines Council Approved Field Technician. A list of these technicians can be obtained from the ABBA Office or from the UGC Website at www.ultrasoundbeef.com.

2. Ultrasound data must be interpreted by either an UGC Lab Certified Technician or an UGC approved Centralized Ultrasound Processing (CUP) Lab. A list of these approved labs or lab technicians can be obtained from the ABBA Office or from the UGC Website at www.ultrasoundbeef.com. In order for the data to be valid it must sent directly from the UGC Certified Lab Technician or UGC Approved Lab to ABBA.

3. All animals must be on file (registered or performance only) with ABBA prior to submitting ultrasound data to ABBA.

4. Ultrasound carcass data must be collected between 334 – 487 days (11 – 16 months of age).

5. ABBA recommends that ALL animals in a given contemporary group be weighed and scanned.

6. Animals should be in good flesh and on an incline of nutrition at the time of scanning. Scanning under these conditions should allow animals to express potential genetic differences for marbling, ribeye area and fat thickness.

Ultrasound guidelines and barn sheets can be downloaded from the ABBA website, www.brahman.org.
ABBA Carcass Evaluation Program

The ABBA Carcass Evaluation Program is designed to provide a cooperative feeding outlet for male calves not suitable for seedstock use and to assist breeders in learning more about the carcass quality of the genetics in their herd.

The following are the guidelines for the ABBA Carcass Evaluation Program:

Nominations Must Be Received by December 15th for Spring Calves

Requirements:
• All Steers Must Be Able To Be Registered By ABBA (Application for Registration)
• All steers must be born between January - May for Spring Delivery (First week of January).
• All steers must be weaned and have completed the suggested VAC -45 Health Program 45-60 days prior to delivery:
• Steers will be harvested when the pen has reached the average weight and condition regarded as acceptable by the industry (approx. 1150 with .3 BF). The decision will be made by the feedyard operator.
• Steers will be fed at Graham Land & Cattle Company in Gonzales, Texas.

ABBA Performance Tested Bull Program

The ABBA Bull Development & Marketing Program is designed to provide Brahman breeders with the opportunity to develop bulls, collect economically relevant data and market commercially oriented bulls in a cooperative effort.

1. Consignors/Nominees must be members of the American Brahman Breeders Association.
2. Bulls must be registered in the American Brahman Breeders Association.
3. Bulls must have a Birth Weight & Weaning Weight submitted prior to being accepted into the program. Bull Actual BW MUST be less than 90 lbs.
4. Bulls MUST be DNA parent verified (to both parents) prior to nomination.
5. Bulls should be weaned at least 45 days, recommended dehorned, received two rounds of injections and dewormed prior to delivery at Texana Feeders in Floresville, Texas.
6. Bulls will be tested for BVD-PI and ONLY NEGATIVE Bulls will be allowed into the test.

Delivery Dates
The program will be for bulls born January-April. The bulls will be delivered to Texana Feeders the middle of March.

Test Outline
• Bulls will be given a 45 day warm up period following delivery to the feedyard.
• After the warm up period the bulls will be weighed into the test, ultrasounded, given a docility score and split into two groups if needed. Any bulls that have a 4-5 docility score, are structurally unsound or sifted by the committee will NOT be allowed to complete the test period and can either be picked up or cut and entered into the Carcass Evaluation Program.
• The test period will be for 120 days when bulls will be weighed off of test.
• By the conclusion of the test, bulls will have been:
  Weighed
  Hip Height taken
  Ultrasounded by an Ultrasound Guidelines Council Approved Technician
  Disposition Score given
  A hair sample taken to be submitted to Zoetis for a DNA Panel & Parent Verification

Data Collected
The following will be the information reported to the breeder and ABBA:
• Start Weight
• Finish Weight
• Average Daily Gain
• Frame Score
• Scrotal Circumference
• Ultrasound Measurements (REA, IMF, Rump Fat & Back Fat)
• DNA Panel Results

Costs
• Nomination Fee: $150/bull – this fee covers all additional test expenses outside of feed and veterinary costs. Bulls consigned to the sale will be charged sale expenses.
• Feed costs will be prorated among the pen and billed monthly. Breeders can pay on a monthly basis or at the end of the test period. It is expected that the feed costs should be an average of $2.50/day. Any feed charges not paid at the time of sale will be deducted from the account of sale.

Consignment Sale
Following the conclusion of the test the top forty (40) high indexing bulls will be prepared for the sale that will take place in October following the completion of the program. The bulls selected for the sale will be turned out on grass and given a growing ration until the time of the sale. The remaining bulls can be picked up or left to be developed for private treaty sales by the breeder.

Complete Program, Sale Guidelines and Nomination Forms can be downloaded from the ABBA website.

we believe in the 
POWER of the NEXT GENERATION

Whether it’s your cow family or your own family, we are committed to the next generation of cattle, and our continued support of youth programs.
You can trust Trans Ova Genetics to combine the art of reproductive technologies with the industry’s most dedicated and experienced team of professionals to help achieve your unique breeding program goals.

multiply success®

www.transova.com
Advanced genetic information and management mean better profits. With industry-leading DNA tests from Zoetis Genetics, you can evaluate economically important traits to make more precise breeding and selection decisions and accelerate genetic progress. To learn more, contact:

Kevin Milliner

kevin.milliner@zoetis.com
At J.D. Hudgins, we take great pride in the fact that while our Brahman cattle have excelled in the show ring for over 80 years, we have never lost sight of the fact that our cattle are first and foremost beef cattle. Over 80% of the Brahman bulls we sell each year go to work in commercial cow herds across the nation as well as internationally.

Visitors are always welcome and our family is always available to accommodate guests.
We are Proud!!

England Cattle Co.

Visitors are always WELCOME at ECC!!

of our new ET mating which includes both our first home raised donor and herd sire. These calves are awesome and offer the industry more bone, correctness, breed character, muscle, strong, level top lines and that special LMC Golden Cross look. We look forward to sharing our finest and freshest genetics with the Brahman World. Come see us!!

Dam - ECC Sherri K is one of our oldest and best producing LMC Polled Authority daughters that we are proud to own with our good friend Kelly Barnard from Kansas.

Sire - ECC El Caporal is our LMC Polled Sambo son that we have sold semen on all over the Brahman World. We love his first calves. Semen is available both domestic and foreign.
TRIPLE H is a family of 2nd and 3rd generation farmers in North Alabama with a focus on quality, functional, and docile cattle. We sell bulls and heifers private treaty throughout the year.

TripleHCattleCo.com

WILLOW WOOD COVE FARM
LOUISVILLE TENNESSEE

Willow Wood Cove Farm is located in east Tennessee about 15 miles south of Knoxville. Our herd originated from the V8 Ranch with the purchase of open heifers and a bull sired by Mr. V8 390/6 and out of Miss V8 797/6. He is a full flush brother to Mr. V8 135/7 and Mr. V8 139/7, two of the top bulls in the breed.

Feel free to stop by any time and take a look!

Drs. Denny and Becky Lillard
Office: 865-983-3155 | Cell: 865-399-2883 | Email: dlillard@countrysidemvelopetservices.com
THE JTB BREEDING PROGRAM

FERTILITY
Unparalleled selection and culling based on early puberty and stayability.

MINIMAL INPUTS
We produce cattle that perform with minimal inputs that help our customer’s bottom line.

PEAK PERFORMANCE
We specifically select and produce low birthweight bulls with heavy weaning and carcass EPDs.

TOP GENETICS
We produced the top grading and the top-selling bulls in the inaugural ABBA Performance Tested Bull Program.

April 13 – 16, 2017
We look forward to a new brand of partnership with the American Brahman Breeders Association as we envision new ways to deliver genomic services to your membership.

From our informative, powerful DNA-based parentage testing to our world-leading GeneSeek® Genomic Profiles. From our unique use of *Bos indicus* gene markers in our technology platforms to our growing presence up and down the Americas.

Our aim is to bring you a world that is full of new possibilities.

Our rapid innovation cycle will focus on your needs, and together we’ll explore the frontier of beef genomics.

We look forward to serving you. To learn more, contact ABBA and take a new look at the horizon of genomic-assisted seedstock production.

**GeneSeek® – A New Brand of Partner**
We look forward to a new brand of partnership with the American Brahman Breeders Association as we envision new ways to deliver genomic services to your membership. From our informative, powerful DNA-based parentage testing to our world-leading GeneSeek® Genomic Profiles. From our unique use of Bos indicus gene markers in our technology platforms to our growing presence up and down the Americas. Our aim is to bring you a world that is full of new possibilities. JOIN TODAY!

AMERICAN BRAHMAN BREEDERS ASSOCIATION

Brahman.org
MEMBERSHIP QUALIFICATIONS:

(a) **ACTIVE MEMBER:** An Active Member shall be an individual partnership, corporation, limited liability company, trust, estate or other legal entity of reputable character who has paid such membership fees as may be established by the Board of Directors.

(b) **ASSOCIATE MEMBER:** An Associate Membership shall be granted to any person or entity of reputable character interested in the promotion of the best interests of the American Brahman breed of cattle, but said Associate Membership shall be without voting rights and without privileges to register cattle at membership rates.

(c) **DESIGNATED REPRESENTATIVE:** A partnership, corporation, limited liability company, trust, estate, or other legal entities upon becoming an Active Member, shall promptly notify the Association in writing, the name of the person authorized to represent their respective organization, and such designated person shall have all of the rights, privileges and consideration of an individual member. An individual Active Member may also appoint a Designated Representative by following the same procedure.

(d) **MEMBERSHIP NAME LIMITED TO 30 CHARACTERS**

**METHOD OF MEMBERSHIP APPROVAL FOR ACTIVE MEMBERS**

Applications for membership shall be completed in writing and signed using forms for such purpose that are furnished by the Association or downloaded from the Association website. Applicants for active membership shall be admitted as an Active Member by a majority vote of the directors present at any regular meeting of the Board of Directors or by the Executive Committee, which ever meets first, if the applicant is considered to be of reputable character and interested in the well-being of the Association. If an application for active membership should be rejected by the Executive Committee or the Board of Directors, the applicant may re-submit application at the next Board of Directors meeting or Annual Membership Meeting of the Association, when such application shall be approved or rejected by a majority of the members present. Full membership privileges will not be granted until the member has been approved by the Executive Committee or the Board of Directors or at Annual Membership Meeting. (From Constitution/ByLaws)

ADVANTAGES OF MEMBERSHIP:

Members through their Board of Directors, with participation in their ABBA Area Elections and with participation in the Annual Meeting of the Association, have a voice in the affairs of the Association. The Annual Meeting of the Association is usually held during the month of March in Houston, Texas.

CESSATION OF PRIVILEGES OF ACTIVE MEMBER (From the Constitution/ByLaws)

(a) **RESIGNATION:** All interest and privileges as a member of this Association and its property shall cease with resignation.

(b) **TRANSFER:** An Active Membership may be transferred to an Active Member only if the new owner/transferee of the cattle will continue to utilize the membership and ranch name and said name will continue to be used to register and transfer cattle. The Board of Directors shall adopt Rules of Transfer within Rules of the Association governing transfer of Active Memberships.

(c) **DISSOLUTION:** If a partnership, corporation, limited liability company, trust, estate or other legal entity shall dissolve for any reason including death, any participant in same shall be entitled to membership upon the payment of the membership fee. The membership may be transferred to any participant as provided by the Rules of Transfer in the Rules of the Association.

(d) **TRUSTS OR ESTATES:** The membership of a trust or estate shall cease upon the termination of the trust or closing of the estate and/or by the request of trustees or administrators. The transfer of the membership of a trust or estate that is an Active Member may be made only as provided for in the Rules of Transfer in the Rules of the Association.

(e) **NON-PAYMENT OF FEES:** Non-payment of any Association fees will be grounds for cessation of privileges.

(f) **VIOLATIVE CONDUCT:** Membership privileges can be temporarily or permanently revoked for Violative Conduct.

**ACTIVE MEMBERSHIP ............................................ $100.00**

COMPLETE OTHER SIDE OF THIS APPLICATION AND MAIL
Application is hereby made for membership in the American Brahman Breeders Association to be issued in the name of
________________________________________________________________________________________________________

If accepted, I/we agree to be governed by the rules, regulations, constitution and by-laws of the Association as amended
from time to time and to keep a written memorandum of breeding and exact birthdates of my/our Brahman cattle: and fur-
ther that I/we will furnish promptly any information concerning same at any time requested to do so by the Association.

A remittance of _________________________ ($100.00) is enclosed for payment of membership fees.
