

Shipping DNA Samples

1

Prepare Samples for Shipment

- Place the collected samples in the designated packaging.
- Label each sample clearly with the animal's registration number and barcode.

2

Ship the Samples

Send the samples to the lab using the address provided on the DNA form.

Confirmation and Results

- The lab will confirm receipt of DNA samples. ABBA will forward the confirmation to the member.
- Results will be processed and shared with members once available.
- For any discrepancies or additional testing, ABBA will notify the member.

Important Notes

- Use only ABBA-approved kits for sample collection.
- Follow sample collection and handling guidelines carefully to avoid contamination.
